

# RCA RCT6203W46 Rear Speaker Replacement

This guide replaces a damaged or disfunctional rear speaker.

Written By: Nicholas Alexander

## INTRODUCTION

In order to reach the rear speaker, the back of the tablet must be removed. This guide requires basic knowledge of soldering.

---

### TOOLS:

- [Spudger](#) (1)
  - [Soldering Station](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
  - [Metal Spudger](#) (1)
-

## Step 1 — Rear Speaker

- Remove these four 4 mm Phillips #00 screws.

## Step 2

- Run a spudger tool around the edge of the screen to loosen it and begin to pry upward.
- The screen will be able to be removed once you see it pop up like it has in the photo.
- ⓘ There are wires attached to the back cover and screen so be careful not to pull them apart.

## Step 3

- With a soldering iron, remove the wires from the circuit board.

**i** Due to the size of the wires, tweezers may be necessary.

## Step 4

- Use a metal spudger to pry out the speakers from its housing.

To reassemble your device, follow these instructions in reverse order.
